PROFILE

Detail-oriented frontend developer with 3+ years of experience building fast, responsive, and accessible web applications using React, Next.js, Tailwind CSS, and WordPress. Skilled at turning Figma designs into real products and integrating with tools like Supabase and Redux. Passionate about clean code, teamwork, and solving real-world problems through intuitive interfaces.

SKILLS

React	Wordpress & Woocommerce
NextJs	Figma
Redux Toolkit	Shadcn
ContextAPI	Jira	Trello
React Query	Mysql
ChartJs	Rechart	Git & Github
Bootstrap	Tailwind	Supabase	FireBase	RestAPI
JavaScript	Accessibility
Typescript	Cross-Browser Compatibility

EMPLOYMENT HISTORY

Mar 2025 — May 2025

Frontend Developer, Equinox
Lagos, Nigeria

- Developed a scalable **admin dashboard** using **Next.js (App Router)** with **TypeScript**, ensuring type safety, modular architecture, and improved developer experience.
- Integrated **Supabase** for authentication, database queries, and real-time data syncing.
- Built interactive and responsive data visualizations using **Recharts**, delivering key business insights.
- Utilized **Shadcn UI** and **Tailwind CSS** to design clean, accessible, and reusable UI components.
- Managed application-wide state with **React Context API**, applying strong typing and code organization practices.
- Followed Git-based workflow, implemented environment-based configurations, and focused on performance optimizations for production readiness.

Apr 2024 — Mar 2025

Technical Support, IPNX Network
Lagos, Nigeria

- Responded to customer inquiries through multiple channels, including **OTRS (ticketing)**, **Ebanqo (live chat)**, and **3CX (calls)** to resolve internet service issues and general account-related concerns.
- Logged and tracked customer complaints using OTRS, ensuring proper escalation and timely follow-up by the technical support team.
- Handled real-time live chat sessions via Ebanqo, resolving issues such as slow connectivity, downtime, and billing inquiries with professionalism and accuracy.
- Provided basic technical guidance to customers over the phone using 3CX, helping with modem configuration, power cycling, and network troubleshooting.
- Collaborated with field engineers and NOC (Network Operations Center) to relay updates and feedback on customer issues.
- Maintained a high customer satisfaction score by ensuring swift and empathetic responses while adhering to company SLAs and communication standards.

Jun 2023 — Dec 2023

Frontend Developer, Macgital
Lagos, Nigeria

- Developed a responsive, data-driven **analytics dashboard** using **React** and **Recharts** to visualize user metrics and KPIs in real-time.
- Integrated secure **user authentication** and role-based access using JSON Web Tokens (JWT) and protected routes.
- Consumed and managed **REST APIs** to fetch, display, and update dynamic data across multiple dashboard modules.

- Built reusable UI components and followed atomic design principles to ensure consistency across the application.
- Focused on clean, maintainable code, optimized state management, and seamless user interactions.
- Collaborated remotely with a small cross-functional team to iterate quickly and deliver core features under tight deadlines

Apr 2022 — Jun 2022	**Frontend Developer, Finquire AI**	United States

- Implemented user-friendly and intuitive interfaces for users to interact with the AI-powered features of the MVP, contributing to enhanced user engagement and satisfaction
- Effectively hosted and managed the WordPress website on an Amazon EC2 instance within the AWS environment, resulting in streamlined operations and improved website performance. Additionally, this facilitated enhanced scalability and reliability, ensuring a seamless user experience.
- Proficiently utilized Linux commands and tools (e.g., SSH via PuTTY) to configure and maintain the EC2 instance, ensuring seamless website performance and security.
- Implemented and configured the Uncomplicated Firewall (UFW) to enhance server security, effectively mitigating potential threats and ensuring a robust hosting environment.

EDUCATION

Nov 2017 — Feb 2023	**B.Sc, Adekunle Ajasin University**	Nigeria
	Biochemistry	

PROJECTS

Igospel Songs

- Developed and maintained the iGospel web application using **React.js**, delivering a seamless user experience for gospel music lovers worldwide.
- Implemented responsive, mobile-first UI components to ensure accessibility across devices.
- Integrated dynamic content, such as sermons, devotionals, and music playlists, contributes to an engaging user interface.
-
  Utilized modern JavaScript (ES6+), React Hooks, and component-based architecture for scalable and maintainable code.
